

Delivering Excellence
Consistently

Bearys
**Institute
of Technology** 
MANGALORE

Our Vision

To be a world-class engineering institution, nurture leaders in every field of technology and groom knowledgeable men and women who can significantly contribute to a progressive, peaceful and greener world.

Clarity of Mind + Purity of Heart

Bearys Institute of Technology (BIT) firmly believes that its motto will help realise its vision. We aim to instil the first half of the motto - Clarity of Mind – through a carefully crafted curriculum of academics and personality development programs.

Today's student with clarity of mind is sure to become tomorrow's focused professional.

The second half of the motto – Purity of Heart – arises when the student is exposed to upholding basic human values, respecting nature and helping the weak and disadvantaged.

We believe that a student with both Clarity of Mind and Purity of Heart not only becomes an exceptionally focused professional but also a responsible citizen.

My Lord! Advance me in knowledge

By the grace of the Almighty, imparting education has always been an integral part of all Bearys initiatives. Among them Bearys Institute of Technology (BIT) takes the pride of place. It is my firm belief that everything about BIT from the inception, planning to execution was preordained by the Almighty. It is my conviction that the same hand will continue to guide us in the years to come.

I have always wondered that when our country can produce Managers of high calibre, why not leaders and innovators too? We at BIT aspire to make our Institution a Centre of Excellence renowned all over the world for producing leaders and innovators. We aim to achieve this by focusing on both Nature and Nurture which form the very foundation of BIT.

It therefore gives me immense pleasure to extend to you a warm welcome to BIT, a gateway towards a new generation of leaders, innovators and professionals in the true sense.

Syed Mohamed Beary
Chairman, BEARYS GROUP OF INSTITUTIONS

BIT, from its inception has been recognized as a futuristic Engineering College. Applauded by the discerning circles, academia & industry leaders, BIT is on the threshold of emerging as a world class institution.

BEARYS INSTITUTE OF TECHNOLOGY, MANGALORE

Karnataka's first fully Integrated Residential Engineering College with a Sustainable Green Campus

Founded by the Bearys Group, BIT is a minority institution under the aegis of Bearys Academy of Learning. We believe that our location and strong environmental orientation, coupled with rigorous academic program, make BIT a college with a difference offering excellent scope for pursuing higher education.

Leveraging the extensive Bearys network and the experience of our faculty, we give our students a local-global perspective as well as excellent exposure to industry-academia interaction. This in turn results in well matched job prospects for the student upon graduation.

The college offers independent residential facilities for boys, girls and faculty to make learning accessible. Sports and recreation facilities are provided for enhanced student interactions and physical fitness.

BIT is a young and dynamically evolving institution reflecting the motivating spirit of its founding principles. We do not have a long history but are future ready.

LOCATION, LOCATION, LOCATION

Advantage Mangalore!

A strategic location and inspiring environment play a major role in stimulating learning.

Over the past few decades Mangalore has become recognised as an educational hub offering superior standards of education. It has also developed into major business and commercial centre with several large and global companies functioning from here. A recent survey has in fact placed Mangalore as the fastest growing non-metro in South India.

Located on the south-west shores of India, Mangalore is among the most picturesque and naturally bountiful cities in South India. It is a multi-cultural and multi-lingual city that is both friendly and welcoming.

education hub with highly literate populace

Getting there

Mangalore city is accessible by all means of transport - road, rail, air and sea. BIT is just 20 kms from the heart of the city. Three National Highways pass through Mangalore.

Transport systems include private buses, KSRTC buses, trains, taxis and auto rickshaws. The city has two railway stations – Mangalore Central (located at Hampankatta) and Mangalore Junction (located at Kankanadi). Train services link Mangalore to almost all the major cities of the country like Mumbai, Hyderabad, Bangalore, Cochin, Ernakulam, Chennai etc.

Mangalore International Airport is about 20 kms north-east of the city centre, handling both domestic and international traffic. Flights from almost all major airports in India and several middle-east countries like Dubai, Muscat, Kuwait, Bahrain, Abu-Dhabi, Riyadh, Doha and Dammam operate daily to this airport.

BE INSPIRED AND TRUSTED

Our Campus

The primary intention of the BIT campus is to blend it with nature and create an integrated environment for learning, teaching and residing. It reflects the sustainable green vision of Bearys group and adheres to the norms and guidelines of Green Building Sustainable Development.

Upon entering the campus the visitor is welcomed by warm laterite facades, and landscaped gardens. Lush greenery surrounds all learning and residential spaces. Classrooms are wide, naturally well ventilated and technology-enabled. Student accommodations are spacious and private. The campus cafeteria caters to all tastes and serves nutritious and balanced meals. Convenience stores and other basic amenities are all available within the campus premises.

Nature + Nurture

All too often we ignore the important lessons that only nature can give us. We must recognise the interconnectedness of nature and nurture. Both must come together for a complete and meaningful education.

creating an **integrated environment**

“BITS is a very impressive addition to the list of Educational Institutions set up by the Bearys’ from 1906 onwards. I am sure with your hard work and dedication, BITS will also flourish and occupy a top ranking position in due course of time, as all your other enterprises do”.

*Mr. Mahendra Raj
Chairman, Mahendra Raj Consultants,
New Delhi
Founder President, Indian Association
of Structural Engineers*

WE INSPIRE EACH OTHER TO GIVE OUR BEST

Our Clubs

BIT constantly strives to encourage talent, inspire innovation & creativity and instil human values among its students. To achieve this, BIT has established 5 dynamic clubs. Students are encouraged to be a part of any of these clubs. Regular activities are conducted by these clubs that enable students to discover their latent talent.

BIT Champions

This club encourages students to excel in sports by giving them opportunities through various sporting events and competitions held in the college as well as at inter-collegiate levels.

BIT A+C

BIT Arts and Cultural forum helps students hone and develop their skills in various activities like dramatics, music, painting, dance, public speaking etc.

BIT Green

Eco consciousness is firmly integrated into BIT's programs. BIT Green Club introduces a unique tradition of Planting Saplings. Both staff and students will each plant a sapling and nurture it. Besides reflecting BIT's strong commitment to the environment, each sapling symbolizes the student whose potential BIT will nurture and bring to fruition.

BIT Pray

Pain Relief and You is a BIT initiative to encourage students and faculty to contribute to the welfare of the underprivileged through social and community service activities.

BIT Innovators

In creating technocrats and leaders of tomorrow, BIT Innovators Club encourages core research & development from both faculty and students.

MEETING YOUR NEEDS

Facilities

The creation of support facilities is a major element of our core strategy. Facilities at BIT are carefully developed in response to student and faculty needs and comfort. A regular rain-check enables us to ensure that the campus is ready with amenities that are updated on regular basis thus making life easy for a smoother functioning.

- Independent hostel facilities for boys and girls – a boon for outstation students.
- Faculty Quarters
- Separate Residences for Foreign / NRI Students
- Fully equipped Computer Lab with WAN, LAN & Internet
- Wi-Fi enabled Campus
- Engineering Workshop
- Physics Lab
- Chemistry Lab
- Computer & CAED Lab
- Central Auditorium
- Seminar Halls
- Well Stocked Library with National & International Journals and access to e-journal networks.
- Career Guidance & Placement Cell
- Sports Ground with Badminton / Volleyball / Basketball/ Football
- Indoor Recreation (Table Tennis, Carrom, Chess, etc.)
- Cafeteria
- Convenience Store
- ATM
- Infirmary
- Central Mess facility for hostel students

NUTURING + GUIDING

Our Esteemed Faculty

Dr. S A Khan

Welcome to your first BIT experience! You will find that everything at BIT is single mindedly focused on addressing student needs. We consider it our primary responsibility to guide students to realizing their goals in an increasingly competitive world.

From academic excellence to leadership qualities, a nurturing environment to cutting edge infrastructure, BIT offers everything you need to succeed. Prepare to be constantly challenged at every step as you are trained by stellar faculty and get hands on experience at leading organisations. BIT is about always pushing the bar a little higher, constantly innovating and never resting. If these are the values you believe in too, then BIT will surely help you realise your dreams.

Dr. S A Khan
Principal
Dean, Research and Development

Dr. S K Raikar

A vision gives an impulse to create a picture of our own and so is the vision of BIT. BIT was established with a strong quest for excellence. Einstein once said *“Look deep into nature and then you will understand everything better.”* BIT provides this opportunity. Situated in serene and calm surroundings in the very lap of Mother Nature, students learn by being close to Mother Nature and aspire for heights in all their endeavours. With the support of highly committed management, dedicated faculty and excellent infrastructure, BIT will surely march ahead to take its place among the leaders of academic institutions.

Dr. S. K. Raikar
Sr. Adviser

Dr. M Sainath

It is rightly said that “Education is for life and not for a living”. Today the crisis of character among India’s youth is evident in every sphere. Employability is at an all time low due to vanishing values like work ethics, sincerity, team spirit etc. These are the very components of a holistic education that Bearys Institute of Technology aims to deliver. While focusing on character building, we have also chalked out a compact educational program that gives students the benefit of sound technical knowledge coupled with human values. We hope that you will be a part of this carefully planned march towards excellence that is certain to be holistic, fulfilling and productive.

Dr. M Sainath
Director-Campus
Head, Outreach Programs, Strategy and Planning

MAKING IT POSSIBLE

Undergraduate Engineering Courses

BIT aims to be a premier Engineering & Technology Institution with a wide cross section of industry relevant undergraduate engineering courses. Since we are in the growth stage, we currently offer four highly coveted undergraduate engineering courses:

- Mechanical Engineering
- Civil Engineering
- Electronics & Communication Engineering
- Computer Science Engineering

Undergraduate Program

Mechanical Engineering

DURATION 8 semesters (4 years)

Mechanical Engineering is the creative application of scientific knowledge & expertise in the design, construction & operation of products & processes. Mechanical engineers combine imagination with modern technology to offer simple, innovative solutions to meet the complex requirements of society and industry.

While our undergraduate course in Mechanical engineering is comprehensive, BIT encourages students to research, to be creative and find simple solutions to mechanical problems.

COURSE CONTENT

Automotive Engineering
 Management Information System
 Material Science & Metallurgy
 Metrology & Measurements
 Thermodynamics
 Manufacturing Processes
 Machine Design
 Foundry & Forging
 Computer Aided Designing
 Kinematics of Machines
 Fluid Mechanics
 Fluid Machinery
 Dynamics of Machinery
 Design of Machine Elements
 Control
 CAD/CAM
 Machine Shop
 Operations Research
 Engineering Economy
 Mechatronics
 Mechanical Vibrations

ELECTIVES

Organisational Behaviour
 Theory of Elasticity
 Internal Combustion Engines
 TQM
 Operations Management
 Hydraulics & Pneumatics
 Heat & Mass Transfer
 Foundry Technology
 Finite Element Methods
 Project Management
 Computer Graphics
 Data Base Management Systems
 CNC Machines
 Gas Dynamics
 Computational Fluid Mechanics & Heat Transfer
 Machine Tool Design
 Fracture Mechanics
 Maintenance Engineering
 Experimental Stress Analysis
 Computer Integrated Manufacturing
 Non-Conventional Energy Sources
 Nano Technology
 Power Plant Engineering
 Product Design & Manufacture
 Tool Engineering & Design
 Composite Materials
 Tribology
 Engineering System Design
 Design of Heat Exchangers
 Financial Accounting & Management
 Industrial Robotics
 Theory of Plasticity
 Agile Manufacturing
 Jet & Rocket Propulsion
 Non-Destructive Testing
 Artificial Intelligence and Expert Systems
 Cryogenics
 Bio Mass Energy Systems
 Design of Experiments
 Industrial Engineering & Economics

A research center for Mechanical Engineering, approved by the Visweswaraya Technological University (VTU) has been instituted for pursuing active research in two thrust areas of Solar Energy and Aerodynamics. It makes way for post graduate as well as doctoral programs in Mechanical Engineering and would enable the faculty and students to access and work with latest technology, ideas and equipment.

Undergraduate Program

Civil Engineering

DURATION 8 semesters (4 years)

Considered one of the oldest engineering disciplines, Civil Engineering involves planning, designing and executing structural works. The course includes a wide variety of engineering tasks including designing, supervision and construction activities of public works like roads, bridges, tunnels, buildings, airports, dams, water works, sewage systems, ports, etc. Thus opening a multitude of challenging career opportunities.

BIT offers a B.E in Civil Engineering. Original research in Civil Engineering is encouraged and facilitated by research faculty.

COURSE CONTENT

Engineering Mathematics
Strength of Materials
Fluid Mechanics
Applied Engineering Geology
Surveying Practice
Structural Analysis
Hydraulics & Hydraulic Machines
Concrete Technology
Design of Structures – RCC
Geotechnical Engineering
Hydrology & Water Resource Engineering
Transportation Engineering
Environmental Engineering
Design & Drawing of RC Structures
Irrigation Engineering & Hydraulic Structures
Matrix Method of Structural Analysis
Rural Water Supply & Sanitation
Design of Masonry Structures
Ground Improvement Techniques
Ground Water Hydrology
Air Pollution & Control
Traffic Engineering
Constitution of India & Professional Ethics
Design of Pre stressed Concrete Structures
Design of Steel Structures
Design & Drawing of Bridges
Theory of Elasticity
Advanced design of RC Structures
Numerical Methods in Civil Engineering
Open Channel Hydraulics
Pavement Materials and Construction
Highway Geometric Design
Ecology & Environment
Solid Waste Management
Rock Mechanics
Earth & Earth Retaining Structures

Undergraduate Program Electronics & Communications Engineering

DURATION 8 semesters (4 years)

Electronic & Communication engineering is an engineering discipline where non-linear and active electrical components such as electron tubes, and semiconductor devices, especially transistors, diodes and integrated circuits, are utilized to design electronic circuits, devices and systems. The term denotes a broad engineering field that covers important subfields such as analog electronics, digital electronics, consumer electronics, embedded systems, power electronics and VLSI. It also gives a balanced coverage of the theory and practice of modern communication engineering in RF, Microwave, optical frequency ranges for various applications in defense, aeronautics and research fields.

BIT aims to groom students in Electronics through innovative course content, research and industry interaction in areas of hardware engineering, Electronic Circuit design, intelligent systems and electronic commerce. Our undergraduate program is designed to give students the ability to identify problems and solve them by creatively using their knowledge gained at BIT. BIT Electronics and communication department has full fledged Laboratories equipped with high-end computers. The Department encourages Innovative projects and guides the students.

Post Graduate and
Research Programs

M.Tech Program in Mechanical Engineering

DURATION 4 semesters (2 years)

The Mechanical Engineering branch at Bearys Institute of Technology will be commencing the Masters program from the academic year 2014-2015. The following programs leading to master of technology (M.Tech) will be offered

M.Tech in Energy System Engineering

The major thrust in this course will be in the direction of non-conventional energy systems like solar energy, wind energy, bio-diesel etc. Students pursuing this course will be exposed to techniques for designing clean and energy efficient mechanical systems.

M.Tech in Computer Science Engineering

DURATION 4 semesters (2 years)

The Computer Sciences Engineering branch is offering a Masters program from the academic year 2014-2015. The course will focus on the frontier areas of computer science engineering that include topics like Network security, Performance analysis, Computer Architecture, Software Systems, Advanced algorithm design, Parallel and Distributed Computing and Networking with Web Technologies. Emphasis will be given in the course to make the students industry-ready by providing them with exciting opportunities for internship and project work.

Doctoral (PhD) program in Physics

BIT has a Research Centre in Physics from the academic year 2014-2015. The centre will carry out sponsored and/or collaborative research projects and will also offer PhD programs.

Doctoral (PhD) program in Mechanical Engineering

Parallel to our academic courses, BIT strongly encourages dynamic research that focuses on generating intellectual capital. We have appointed a Dean of Research to wholly concentrate on seminal academic and applied research in different aspects of engineering and related subject areas. Our research centre has an extensive network with industry. Interactive projects providing a theoretical, empirical and practical foundation for informed study.

ON TOP OF THE WORLD

Graduation Day Ceremony

The first graduation ceremony of BIT was celebrated on 24th May 2013. It was memorable in more ways than one when the first batch of BIT students stepped out of the portals of their alma mater and transited from being mere learners to now becoming the doers.

The object of education is to prepare the young to educate themselves throughout their lives.

Robert M. Hutchins

THE ANNUAL DAY

BIT Utsav

BIT Utsav is a celebration of the students, staff and faculty of the college's annual day. In this celebration, the college acknowledges the achievements of its meritorious students and faculty. The carnival-like atmosphere forms the ideal platform for students to present their skills and talents in various forms.

AIMING HIGH

BIT Achievements

It is a fitting testimony to the founding principles of BIT that the college could achieve outstanding result within such a short span of its existence.

100% Results and University Toppers—
The BIT has the distinction of achieving:

100%	81%	19%
Results in its very first batch	Distinctions	First Classes

A rare feat carried out by the painstaking efforts of faculty and management with solid mentoring and individual attention to each and every student.

What is more, BIT students secured 16 university ranks within the short span of the first 4 years of its existence, a creditable and rare achievement and a pointer to the potential and the immense possibilities that lie ahead in the future.

Academic year	Number of University toppers from BIT below the rank of 20
2010-2011	3
2011-2012	9
2012-2013 (upto odd semester only)	4
Total	16

Admissions & Scholarships

BIT invites students from across India and abroad to share in the experience of a complete education. Regardless of religion, race, ethnicity, gender or colour, we accept all those who come to learn, share their views, develop new ideas and imbibe knowledge to make our world a better place to live.

BIT does not accept any capitation fee or demand donations. Admissions are strictly based on merit of the student and his/her ability to demonstrate academic excellence, a well rounded personality, extra-curricular interests, a commitment to social causes and environmental consciousness.

Interview policy

All applicants are required to attend an interview before we offer them a seat. The interview allows us to assess the applicant's capabilities while they can determine if this is the right place for them to study. The interview itself is only one part of this meeting after which prospective students and parents can meet the staff, go around the campus, examine our facilities and gather all the information required to make an informed choice.

Eligibility

10+2 or its equivalent with a minimum average of 45% marks in Physics & Mathematics along with one of the following subjects – Chemistry/ Biotechnology/ Computer Science/ Biology. For applicants belonging to SC/ST/OBC of Karnataka State the minimum average is 40% Note: Eligibility will be as per University Norms.

Scholarships

BIT offers upto 100% concession in fees to deserving students. These include students who are economically deprived and those who excel in sports, NCC, NSS and other extracurricular activities. Meritorious students will also be eligible for suitable scholarships. Those with CET rankings less than 1000 will be provided with 100% exemption from fees while those with rankings less than 5000 will be eligible for concessions upto 50% in fees. BIT also conducts its own talent hunt tests wherein students meeting the specified qualification are offered handsome concessions in fee.

One of the key strengths of BIT engineering college is its pioneering thought leaders who are shaping it to be a world class institution and producing real talent—a key differentiator for today's needs. I have known Bearys Group since 2000, and everything that seems ordinary becomes extraordinary with their dedication, wisdom, hardwork and unparalleled eye for detail. Given the dedicated people behind BIT, I recommend students who are committed to pursue their education to be a part of this institution.

Altaf Mulla
Director, Product Marketing
Motorola

EXPERIENCING THE REAL WORLD

Training & Placement Services

Our first batch of students are employed with companies like Infosys, HP, IBM, Cognizant, Wipro, TCS, Mphasis, ING Vysya bank, HAL, CGI and Accenture, L&T, Shapoorjipallonji, to name a few.

Training activities for students which are handled by professionals typically run to a structured 80-90 hour program.

Communication skills, mock interviews, group discussions, aptitude tests, logical analysis and reasoning are some of the activities which are mandatory part of curriculum for the students.

Training and Placement Cell at BIT

Bearys Institute has a dedicated Training and Placement cell with a full time qualified training and placement officer who handles these programs. The cell has now streamlined its operations and is also active in inviting industry partners to conduct campus interviews. The T&P cell helps students who register for its services to attend campus interviews at other places as well. It also facilitates students to attend field selection tests and exams for service into the defense forces of India as well as the Merchant Navy.

Alumni placement record at BIT

Our first batch of students (passed out in 2013) have found employment with some leading companies like Infosys, Mphasis, Wipro, TCS, ING Vysya Bank, HP, IBM, Cognizant, HAL, CGI, L&T, S&P and Accenture etc. While some students have joined their own businesses, others have gone abroad to join firms there. Some of our students have also gone on to do further studies while a portion have decided to study for the Civil services. This is an achievement worth taking note of since it has been achieved with the very first batch of students. This year, Bearys Institute of Technology is bringing in an increased number of companies to facilitate campus interviews and thus give a wider range of exposure to its students in terms of placements.

Training programs at BIT

We at Bearys Institute of Technology believe in giving a holistic development program to our students so that they are able to meet the requirements of industry and society without feeling any lacunae in the transition from the student life to that of a working professional. College education ensures imparting of technical knowledge to students. However, industry and social requirements need to be considered into the curriculum as well so that students will develop the necessary skills to match the demands of industrial engineering, research and development.

To this end, students of the Institute are imparted a training program that is rich in skills and techniques ideally suited for enabling them to tackle the challenges of seeking and settling into a professional life. Communication skills, mock interviews, group discussions, aptitude tests, logical analysis and reasoning are some of the co-curricular activities in which the students are involved in. These activities, handled by professionals, typically run to a structured 80-90 hour program conducted through a well structured course. Industrial visits and industrial internships are also arranged for our students so that they get a feel and understanding of the practical aspect of what they learn. Skill-gap training is also provided to students by experts to make them Industry-ready.

Outreach Programs

Research and Development (R&D) in India has always been a matter of serious concern. With poor funding support from Government (in comparison to countries like the USA, Japan and China) as well as a dismal number of researchers, India's foothold in the realm of R&D is quite slippery.

We at BIT are striving to provide the right opportunities to our students and faculty by entering into agreements with academic institutions and the industry to provide support in our endeavours and set up several Outreach programs for mutual benefit.

In our pursuit to excel in our Outreach programs, we have chalked up an enviable record in the academic year 2013-2014. With systematic plans afoot, further success in the coming years is sure to follow.

In recent months, BIT has concluded agreements that are groundbreaking and aimed at enhancing the content and quality of its academic programs giving access to students and faculty to the best counterparts for both academic and professional training and development. These may be truly regarded as milestones in the onward march of BIT to be a world class institution.

MOU with North Dakota State University (NDSU)

BIT has signed a memorandum of understanding (MOU) with the North Dakota State University (NDSU), USA, on October 25, 2013. The signing of this MOU throws open new avenues for joint development and conduct of a range of academic and research programs for the faculty and students of BIT and the NDSU which in the long run will greatly benefit both. The joint programs include collaborative research and education, exchange of students and faculty, cultural exchange, joint seminars and workshops, sharing of knowledge, sharing of new technologies and new methods of management through extension and other programs and funding opportunities for joint activity, among others. The signing of the MOU comes at a time when BIT is on the threshold of embarking on new and diverse academic and research programs which would help impart new dimensions to education with improved practices, innovative approach and an international outlook.

Mechanical Engineering Research Centre

A research center for Mechanical Engineering, approved by the Visweswaraya Technological University (VTU), was inaugurated by Mr. L.K. Atheeq, IAS, Sr. Adviser to the Executive Director, World Bank, Washington DC on 24th of August 2013.

The research centre at the BIT campus would initially be pursuing active research in two thrust areas of Solar Energy and Aerodynamics. The inauguration of the research center also enables BIT to offer post graduate as well as doctoral programs in Mechanical Engineering. Another academically notable feature of the research center is that it would enable the faculty and students to access and work with cutting edge technology, ideas and equipment.

International Nuclear Structure and Decay Data Network (NSDD)

BIT is all set to be part of an International Group which will be involved with evaluating nuclear data and interpreting the Physics behind nuclei structures. These programs are coordinated by International NSDD Network, International Atomic Energy Agency (IAEA), and National Nuclear Data Centre (NNDC), USA. The Bhabha Atomic Energy Research Centre (BARC) coordinates this program in India. BIT will be one of the centers where the evaluations will be carried out in collaboration with the others for programs like EXFOR and ENSDF. These programs may also be eligible for funding by Nuclear Data Physics Centre India (NDPCI) and will put BIT in academic collaboration with leading research centers in India and abroad in the field of Nuclear Physics.

Institute of Electronics and Telecommunication Engineers Student Forum (ISF)

IETE is India's largest professional organization of Electronics and Telecommunication Engineers. It is a matter of considerable importance that BIT becomes one of the first academic institutions in Mangalore region to open a Students Forum of IETE (called ISF) within its campus. This will enable the students to access IETE's enormous resources in the form of personnel including researchers and scientists, advanced laboratories, publications, events, developments and academic programs. Industrial visits, internships, placements and project work related activity now becomes possible in premier laboratories and academic institutions for students of BIT.

BIT-Linux Group set up

BIT's Computer Science students initiated steps to start a BIT-Linux User Group (BIT-LUG) to better understand and promote the use of open source technologies with active encouragement of the faculty and the college administration. This is a welcome initiative by the students of BIT in the direction of making software technology freely available to users.

CONTINUING A LEGACY

Bearys Group

Delivering Excellence
Consistently

'Delivering excellence consistently' sums up the spirit of the Bearys Group. Right from the start, we identified 'Triple E' - Entrepreneurship, Environment and Education as three key focus areas to which we commit a relentless pursuit of quality and utmost customer satisfaction. We support all our initiatives in these areas with specialist engineering and management teams who bring to our projects experience, expertise and varied skills. Moreover, we are fortunate to have an eminent global network of technocrats, educators, engineers, architects, consultants and service providers who endorse our work and add significant value to each one of our endeavors.

Triple E

Entrepreneurship

From humble beginnings as real estate agents in 1981, today we offer a wide spectrum of services across the real estate sector; from design, development, construction, management, coordination, to marketing and advisory services.

We meet the real estate and property development needs of corporate, government agencies, MNCs and innumerable individuals in India and abroad. Today we have created a niche in property development with several award winning projects that are architecturally innovative, functionally sound, environmentally conscious and offer highest value for investment. We continually strive to chart new territory and set new benchmarks in the industry.

Environment

As a founding member of the Indian Green Building Council (IGBC), all our projects are synonymous with 'Sustainable Green Architecture'. We believe in creating spaces that respect nature and contribute positively to the neighborhood. Not resting on the laurels awarded to us for our efforts in this sphere, we endeavor to be truly 'Green' in all our initiatives.

Education

Taking forward the legacy of our late father who was a dedicated teacher, we have been establishing several educational institutions from the primary to collegiate level since 1906. Set up under the aegis of charitable trusts, these institutions impart quality education especially to rural communities and the economically backward. Montessories have become an integral part of all our projects. We also spearhead a number of socially relevant projects as part of our Corporate Social Responsibility (CSR) including "Clean City - Green City" a path breaking initiative along with IGBC.

Bearys Group

The Future

Bearys Knowledge Campus

BIT is the flagbearer institute of the Bearys Education initiatives. Besides demonstrating the Group's commitment to quality education, it introduces a new and visionary concept of learning where nature and nurture effectively come together to offer a complete education.

Embrace Change

Among the many lessons we learn from nature every day, two have been significant – 'embrace change' and 'continuously grow'. BIT firmly adheres to these principles of nature. We are focused on the changing needs of students, industry and academia. We believe this focus must always translate into the curriculum, course material, assessments, appraisals and upgradation of campus facilities.

In order to continuously grow, we are determined to expand our community of learners, from students to faculty to staff. Academically too, we aim to augment courses with Electrical, Chemical, Marine, Aeronautical, Biotechnology, Environmental and Industrial Management Engineering added to our list of offerings.

On a larger scale, the BIT campus is designed for change and growth. Our campus is scalable and offers dynamic, modular options within each building. Looking beyond the Engineering stream, the Bearys Group has created a master plan for a collection of educational institutions, among them:

- Bearys School of Sustainable Architecture
- Bearys Institute of Planning & Management
- Sarah Fathima School of Fashion Design

BIT is the beginning of an exciting journey for the Bearys Group and for all who join the Institute. We look forward to welcoming you, learning with you and helping you reach your full potential as a responsible and successful leader for a better world.

Education is the manifestation of the perfection already in man.

-Swami Vivekananda

This kind of education needs institutions that are dedicated to the social cause with a strong sense of commitment. I have known Syed Beary for a number of years as an authentic, humane and committed man. I am delighted to know Bearys Group is getting into this arena that is crying out for such people. I wish Bearys Group God speed and good luck.

B Sheikh Ali

Entrepreneurship

One of the principles strongly encouraged by the management of BIT is the principle of Entrepreneurship. Entrepreneurship is an innate ability to spot opportunities and make it a success. It need not involve formal education but calls for vision, hard work and perseverance. It is driven with a passion towards the goal and the willingness to sacrifice. It is these very qualities that the Bearys group seeks to encourage. Plans are being prepared to finance persons with the spirit of entrepreneurship who wish to make their ideas see the light of reality – people who would build institutions with the sheer strength of their vision, hope and hard work.

kodi, kundapur, Udupi District

The Bearys Group, already with the proven record of holistic values and esthetics in architecture, is now applying itself in creating a world class institute of technology. I'm confident that this institute, built in beautiful environs, will cater to both education excellence as well as nurturing the human spirit, as the Bearys truly believe that education is not merely for a living, but for a life.
